Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claims 4 and 6 are objected to because of the following informalities: Both claims recite the light storage film being formed on "the surface" of the light guide plate. It is unclear which surface applicant is referring to since the light guide plate inherently has 2 surfaces other than the two opposed sides. Appropriate correction is required.

Allowable Subject Matter

2. Claims 2-6 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter: Although cited art Lengyel discloses a prismatic light guide plate with a phosphor coating on the interior reflective surface of the housing, the prior art cited of record does not teach the following: a light guide plate having opposed sides and being optically coupled to the light source for emitting light incident from the light source through one opposed side thereof the light guide plate being formed with convexes and concaves having different densities or sizes depending upon the distance from the light source on one side thereof and a reflective film which is disposed on the other opposed side of the light guide plate wherein:

- The reflective film comprises a light storage material incorporated in the reflective film;
- The light guide plate is made of transparent material in which a light storage material is blended;

Art Unit: 2875

- A light storage film is formed on the surface of the light guide plate;
- A light storage film is formed on the surface of the light guide plate; and wherein the concentration of the light storage material in the light storage material in the light storage layer is increased from its one end adjacent to the light source to the other end thereof.

Conclusion

4. This application is in condition for allowance except for the following formal matters:

As stated above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
